Input Sample 1 — Investigation Report A major financial fraud was uncovered in Mumbai where multiple shell companies were used to divert public funds. Investigators found that the directors of the firms were involved in illegal money transfers to offshore accounts. The Enforcement Directorate has initiated a probe and seized digital devices for further forensic analysis. Initial reports suggest that the scam may exceed ■150 crore.

Input Sample 2 — Journalism Article Cybersecurity experts reported a massive data breach that exposed the personal information of over 2 million users. The breach occurred due to a vulnerability in the authentication server of a major tech company. Officials claim that the attack originated from an overseas hacking group, raising concerns about national security. The government is expected to introduce new cybersecurity regulations as a response.

Input Sample 3 — Research/Academic Text Climate change has significantly impacted crop productivity in India, particularly in regions dependent on monsoon rainfall. A recent study highlights that temperature anomalies and unseasonal rains are leading to reduced yield of rice and wheat. Researchers suggest integrating AI-driven forecasting models to help farmers make better decisions.

Input Sample 4 — Crime Case Brief Police arrested three individuals linked to a drug trafficking network operating across two states. The suspects used encrypted messaging apps to coordinate deliveries. Authorities recovered narcotics worth ■25 crore during a targeted raid based on confidential intelligence.
